

FISD Year in Review 2024

THANK YOU TO OUR 2024 FISD Global Sponsors

What a Year!

FISD remains the global forum of choice for industry participants to discuss, understand and facilitate the evolution of financial information.

In 2024, FISD hosted more events than ever before including debuting FISD Boston and FISD Bengaluru and two major conferences.

We dove deep on AI, Cloud, DORA and Consolidated Tape and are looking forward to a new year of topics and emerging trends.

I hope you enjoy our retrospective. I'm looking forward to a fantastic 2025.

Welcomed

WFIC 2024 AUSTIN, TX

The 16th biennial World Financial Information Conference took place September 15-19 in Austin, Texas. Everything is bigger in Texas, and as such, this was FISD's largest WFIC to date. Over 700 financial information professionals from around the globe convened for 3 ½ days of keynotes, panels, roundtables, data engineering workshops, and the best networking in the financial information business!

We are especially grateful for our sponsors, steering committee, speakers and attendees for making it such a success.

New this year was the inaugural Rising Star fellowship program. FISD honored five emerging leaders in the industry. They spoke on a panel about the Future of Market Data, cohosted a Rising Star Happy Hour, sponsored by Bloomberg, and were recognized at the Celebration of Excellence, sponsored by ICE.

Bloomberg's Sallianne Taylor was awarded the Financial Information Lifetime Achievement Award for her significant contributions to the industry.

WFIC returns in 2026 in Europe.

37 SPONSORS

3 KEYNOTES

14 PANELS

20 ROUNDTABLES

104 SPEAKERS

Attendees came from 30+ countries

AsiaFIC

The second AsiaFIC was a resounding success. 300+ delegates joined FISD in Singapore for two days of panels, roundtables, Engineering Stream workshops, and great networking. The delegate diversity was high with representation from 25 Exchanges, from 27 Consumer firms and from 46 Data Vendor, Solution/Service provider and Consulting firms.

We really enjoyed hosting you and watching the major trends in our financial data industry being explored through panels, roundtables, workshops and animated interactive social discussions.

We learned how the adoption of cloud is maturing and how AI is emerging in our financial data space. We explored 2 examples of innovative market internationalization and the 5x24 trading of live US equity markets. We also learned about “carbon” market data and how the financial community is dealing with compliance-driven and project-driven carbon trading.

Join us May 29 - 30 in Singapore for the third annual AsiaFIC. Registration opens in January 2025.
